Practicing Oral History

About the Series

Oral history offers tremendous opportunities for interpreting the past and the increasingly complex present through the words of those who have lived it. The recorded interview, along with careful planning, solid background research, and archiving, form the basis of oral history methodology. Practitioners in public history, cultural heritage, library science, education, documentary, community activism, and local history groups wish to incorporate oral histories into their own work, and they need a road map for doing so.

The 'Practicing Oral History' series fills this gap. Titles consist of concise, instructive books that address the special circumstances of oral history within a specific user community. Each title provides practical tools for conducting and presenting an oral history project that interprets the best practices and ethical considerations of a particular context.

Ideas and proposals for new titles are welcome. Send queries to series editor Nancy MacKay, nancymackay@gmail.com

2nd Edition

By **Nancy MacKay**

October 15, 2015

For the past ten years, Nancy MacKay's *Curating Oral Histories* (2006) has been the one-stop shop for librarians, curators, program administrators, and project managers who are involved in turning an oral history interview into a primary research document, available for use in a repository. In this ...
